

Industry Intermediary

Appteon, Inc.

Industry

Information Technology (IT)

Approved Occupations

All Information Technology and Cybersecurity Occupations.

Target Registered Apprentice Populations

Underrepresented Populations Including: People of Color, Women, Veterans, Individuals with Disabilities, Displaced Workers, Low-Income, and Youth.

Project Overview

Appteon strives to expand the use of Registered Apprenticeship (RA) in tech occupations; to improve recruiting, training, and retention of IT talent; and to increase diversity, equity, inclusion, and accessibility (DEIA) to these in-demand careers. We partner with employers and group sponsors to develop or expand RA programs and to help create sustainable community networks of support.

Types of Services or Technical Assistance (TA) Provided

- Facilitate the development of new RAs and the expansion of existing RAs in coordination with federal and state apprenticeship agencies
- Provide customized TA to support the launch and maintenance of tech RAs
- Connect sponsors with workforce, education, and community programs
- Provide training and resources intended to improve DEIA practices
- Provide partners incentive funding and assistance identifying additional funding opportunities
- Conduct outreach to raise national awareness of RA as a modern and strategic IT talent solution
