

# 'Apprentices by State' Map Navigation

Below is a high-level overview of how to navigate the 'Apprentices by State' Map. **Note:** the image may differ slightly from the visual on the apprenticeship.gov Data & Statistics page due to ongoing feature additions and improvements.

## Tips for Navigation:

- The left-hand navigation filters allow you to drill down into multiple demographic categories going back to fiscal year (FY) 2013.
- You can obtain granular breakdown of each demographic subcategory in the 'Breakdown by [Demographic Category]' chart.
- Clicking on a state or territory in the map will filter data to that specific selection.
- You can also drill down to the county level by clicking on the plus [+] sign at the top of the State & County chart.
- These icons allow you to perform the following actions:
  - Undo your last action.
  - Replay animation on the map. This option is only available if you have a state selected.
  - Reset the map to its default settings. This is a great trick for when you have a lot of filters selected.
  - Share the map via email or social media.
  - Download a visual of the map.
  - View the map in Full Screen mode.
