Target Registered Apprentice Populations

Dislocated workers, Low-Income, Minorities, Persons with Disabilities, Veterans, and Women.

Project Overview

Appteon has been developing technology solutions for nearly 20 years, including supporting the Office of Apprenticeship with the modernization of RAPIDS and creating tools such as Standards Builder, Quality Performance, and Salesforce data integration with RAPIDS. As an IT Employer, Sponsor, and Industry Intermediary, we understand the complex workforce challenges of the industry and the value Registered Apprenticeship Programs (RAPs) can bring to recruiting, training, and retaining technical talent. Our workforce development team has Registered Apprenticeship, education, and workforce system expertise to guide sponsors in the development and expansion of regional and national inclusive RAPs.

Types of Services/TA Provided

- Facilitate development of standards between employers and the apprenticeship system
- Provide customized assistance for outreach and partnership development, EEO/AAP, connection to DEIA resources, identification of funding and networking sources, and sharing best practices

Key Partners

- Greater Washington Apprenticeship Network
- ICF International, Inc.
- Women in CyberSecurity (WiCyS)
- National network of apprenticeship sponsors and educational providers
