- Other: Innovative Systems Group; Wilson Workforce Rehabilitation Center

Target Apprentice Populations

- Veterans
- Women
- Minorities
- Low-Income Adults
- Dislocated Workers
- Individuals with Disabilities

Project Overview

Appteon has been developing technology solutions for more than 17 years, including supporting the Office of Apprenticeship (OA) with the modernization of the Registered Apprenticeship Sponsor Information Database (RAPIDS) and creation of numerous tools including Standards Builder, Quality Performance, and Salesforce data integration with RAPIDS. Appteon brings expertise to the project as an IT industry employer with substantial apprenticeship technology experience, and relationships with OA, State Apprenticeship Agencies, Program Sponsors, Grantees, Workforce Intermediaries, and other stakeholders. Appteon and its partners will engage IT industry peers, workforce entities, and organizations representing target populations to create inclusive apprenticeship programs. These apprenticeship programs will help build an IT talent pipeline and create a new Technology Service Platform tool that will continue to advance technology solutions for the expansion of apprenticeship.
